PROFILE

Results-oriented Full-Stack Web Developer with 2 years of hands-on experience building and deploying robust web applications. I specialize in front-end development with React and Tailwind CSS, creating modern and responsive user interfaces, and back-end development with Laravel, building scalable APIs and server-side logic. Proficient in version control with Git/GitHub and skilled in deploying projects to production using platforms like Vercel. I'm passionate about delivering high-quality code and collaborating with teams to solve complex problems and create seamless user experiences.

WORK EXPERIENCE

BEST WESTERN METRO CLARK

2025 - PRESENT

Web Developer

- **Full-Stack Development & API Integration:** Architected and developed a robust full-stack application, leveraging React for a dynamic front-end and Laravel for a scalable API backend, facilitating seamless data exchange.
- **Modern UI/UX Implementation:** Designed and implemented responsive, user-friendly interfaces using React and styled efficiently with Tailwind CSS, ensuring an optimal experience across all devices.
- **Efficient Data Communication:** Utilized Axios for asynchronous HTTP requests to effectively communicate with the Laravel API, enabling smooth data retrieval and submission without full page reloads.
- **Database Design & Management:** Designed and managed the underlying MySQL database schema within the Laravel framework to store and retrieve application-critical data efficiently.
- **Multi-Platform Deployment & Hosting:** Successfully deployed the React front-end to Vercel for lightning-fast performance and global distribution, while hosting the Laravel backend on Hostinger, demonstrating expertise in modern deployment strategies.
- **Component-Based Architecture:** Implemented a modular, component-based architecture in React, enhancing code reusability, maintainability, and scalability for future feature development.

Gradsquad Studio

2023 - 2024

Web Developer

- **Front-End Development:** Developed and maintained the company's public-facing website using HTML, CSS, and vanilla JavaScript. Implemented AJAX to handle asynchronous requests for data, ensuring a more dynamic and responsive user experience without page reloads.
- **Database Organization:** Database Organization & Management: Successfully restructured and organized the company's internal MySQL database, which improved data accessibility and streamlined the team's workflow.
- **Client & Team Collaboration:** Collaborated with the photography team to understand their operational needs and provided technical solutions, contributing to a more efficient digital workflow.
- **Website Maintenance & Updates:** Implemented design and content updates to the website based on feedback from the team, enhancing the site's functionality and visual appeal.
